

Not Compatible 2023 Model Y - Austin Builds

It has just been brought to our attention that there has been a running change in the production of the 2023 Model Y. With this change, we cannot currently support this system yet, but are working on a solution. The solution will mean running a wire to the front of the car instead of under the seat.

Compatible 2023 Model Y and Previous years

This has been the standard connection since Tesla has launched the Model 3 and Y platforms. We support this connection only as of this moment.
